

Month	Day	Speaker	Affiliation	Title
Jan	28	Brad Schuster	NMSU-Department of Biology	<i>Message from the department head: It's Groundhog Day...again</i>
Feb	4	Dr. Henrietta Pichon	New Mexico State University	<i>Telling the Stories of the Unseen: Black Students' Experiences at an HSI</i>
Feb	11	Dr. Michael Andersen	University of New Mexico	<i>Island Life: Avian diversification across the Indo-Pacific</i>
Feb	18	Dr. Elizabeth Derryberry	University of Tennessee-Knoxville	<i>Singing in a silent spring: birds respond to reduced noise pollution during the COVID-19 shutdown</i>
Feb	25	Dr. Mario Muscarella	University of Alaska-Fairbank	<i>Physiological Constraints on Bacterial Growth Efficiency</i>
Mar	4	Dr. Dan Becker	University of Oklahoma	<i>Food for thought: effects of agricultural change on disease risks to and from Neotropical bat species</i>
Mar	11	Dr. Phil Manlick	University of New Mexico	<i>The causes and consequences of individual foraging dynamics</i>
Mar	18	Dr. Meritxell Riquelme	Center for Scientific Research and Higher	<i>Shaping fungal hyphae: the many paths that vesicles can take</i>
Mar	25			
Apr	1	Dr. Sourav Roy	University of Texas, El Paso	<i>Bioinformatic Approaches for Identification of Gene Regulatory Elements and miRNA Targets</i>
Apr	8	Dr. Jose Vargas-Muñiz	University of North Carolina-Chapel Hill	<i>The role of morphogenesis in fungal pathogenesis</i>
Apr	15	Dr. Charlotte Alster	University of California-Irvine	<i>Assessing temperature sensitivity of soil microbes using a trait-based approach</i>
Apr	22	Dr. Robin Harris	Arizona State University	<i>Tissue regeneration: The genetic response to apoptotic versus necrotic injury</i>
Apr	29	Chiann-Ling Yeh	University of Washington	<i>Species-wide investigation of natural genetic variants impacting yeast phenotypic landscape</i>
May	6	Grad Awardees	NMSU-Department of Biology	<i>An eclectic celebration of biology but all online</i>
